

Disney Conservation Fund Two-Year Grant Recipients 2017

Disney Conservation Fund Two-Year Grant Recipients 2017					
Organization Name	Project Title	Project Description	Species	Geographic Region	Country
African People & Wildlife Fund	Northern Tanzania Big Cats Conservation Initiative	Working with local communities to save Tanzania's most threatened lion, cheetah, and leopard populations. Successfully reducing lion-livestock conflict via environmentally-friendly livestock enclosures called Living Walls, protecting vital habitat for big cats, and engaging local Maasai people in environmental education, natural resource management and sustainable enterprise development.	African Lions	Africa	Tanzania
Arizona State University Foundation, School for the Future of Innovation in Society	Developing solar-powered Illuminated Nets to Reduce Sea Turtle Bycatch in Gillnet Fisheries	Reducing accidental bycatch of sea turtles in Mexican net fisheries through solar-powered illuminated fishing nets that provide turtles with a visual cue to help them avoid entanglement in nets. Educating, inspiring and empowering local fishermen to develop sea turtle bycatch solutions that suit the needs of their fishing communities.	Green and Loggerhead Sea Turtles	Marine	Mexico
Association of Zoological Horticulture	AZH Plant Conservation Grant Program	Awarding funds to qualified AZH plant conservation programs to protect and study important species.	Multiple Species	Global	Global
Association of Zoos and Aquariums	Conservation Grants Program	Awarding grants to zoo conservation leaders in six categories, including animal health, animal welfare, conservation education, field conservation, management and/or breeding, and research.	Multiple Species	Global	Global
Audubon Connecticut	Urban Oases for Migrating Songbirds	Identifying, improving, and conserving important stopover habitat for migrating songbirds in urban landscapes in North America. Using a combination of community-based land stewardship, demonstration habitats, citizenship science, and innovative education programs to create conservation models that create key stepping stones for birds along their annual migratory journeys.	Golden-winged Warblers	North America	United States
Audubon Florida	Jay Watch: Audubon Citizen Science	Training 270 skilled citizen science volunteers in 19 Florida counties to collect breeding success data on the endemic Florida scrub-jay. Using research and data to manage important scrub-jay habitat, and supporting outreach, research and population assessments by wildlife agencies.	Florida Scrub-Jays	North America	United States
Bok Tower Gardens Foundation	Rare Plant Restoration and Research	Researching, reintroducing, and preserving rare plant species at 20 sites across central Florida. Engaging the Florida community in education programs, student and intern training, and forming non-traditional partnerships to support habitat restoration efforts.	Scrub Lupines, Britton's Beargrass Long-leaf Pines, and other rare plant species	North America	United States
Central Caribbean Marine Institute	Establishing the Next Generation of Resilient Coral Species	Reversing the decline of corals in The Cayman Islands by researching the coral restoration cycle and improving the capacity of endangered corals to survive and regenerate in the wild. Engaging student groups, citizen scientists, and local dive professionals in coral conservation in the Caribbean.	Elkhorn, Staghorn, and Massive Star Corals	Marine	Cayman Islands
Cheetah Conservation Botswana (Wildlife Conservation Network)	Community Education for Carnivore Conservation	Improving farming practices and reducing carnivore-livestock conflict in Botswana. Focusing on supporting communities through farmer training workshops, youth bush camps and conflict mitigation demonstrations in the Western Kalahari to improve livelihoods while protecting cheetahs and other carnivores.	Cheetahs	Africa	Botswana

Disney Conservation Fund Two-Year Grant Recipients 2017

Chicago Zoological Society	Evaluating Responsible Dolphin Viewing Practices	Building on previous work to evaluate and improve dolphin viewing practices and engage stakeholders to reduce human impacts on bottlenose dolphins off the coast of Florida. Testing new monitoring technology and collaborating with ecotour operators to create regional wildlife viewing solutions that benefit both human and animals.	Bottlenose Dolphins	Marine	United States
Coastal Plains Institute	Building Communities That Conserve Wetlands	Building on an existing project to save the rare striped newt by combining education standard-aligned activities and citizen scientist training to conserve the biodiversity of wetlands in Florida. Providing experiential learning opportunities for students and other citizens to collect ecological data from wetlands, increasing local environmental literacy and capacity to detect future declines of amphibian species.	Striped Newts, Gopher Frogs, and 17 other amphibian species	North America	United States
Denver Zoological Foundation, Inc.	Expanding Critical Habitat Conservation: Vietnam	Promoting population growth of the critically endangered Tonkin snub-nosed monkey in Vietnam. Building community support for the protection of this monkey's habitat, while replicating and expanding successful conservation efforts to new communities surrounding boundaries of a newly-established national park that will further protect wildlife habitats.	Tonkin snub-nosed Monkeys	Asia	Vietnam
Durrell Wildlife Conservation Trust (American Friends of Durrell Wildlife Conservation Trust)	Restoring the Pygmy Hog	Saving the critically endangered pygmy hog from extinction through captive breeding and reintroduction to its historical range in India. Continuing a successful captive breeding and release program and working with local protected area managers and communities to support ecosystem restoration to provide habitat for pygmy hogs.	Pygmy Hogs	Asia	India
Durrell Wildlife Conservation Trust (American Friends of Durrell Wildlife Conservation Trust)	Saving the Ploughshares from Extinction	Ensuring the survival of the ploughshare tortoise in Madagascar through community-based patrols, monitoring and tracking tortoises, and a captive-breeding program. Raising local pride for the species to reduce the temptations to poach.	Ploughshare Tortoises	Africa	Madagascar
Environmental Protection in the Caribbean	Towards Black-capped Petrel Conservation	Working with villages in Haiti to alleviate poverty and increase sustainable agriculture while increasing awareness of the endangered black-capped petrel bird. Monitoring existing petrel populations to understand the effects of conservation efforts.	Black-capped Petrels	Central/ South America	Haiti
Fauna & Flora International (ADM Capital Foundation)	Conserving the Cao Vit Gibbon	Securing the last population of the critically endangered eastern black-crested gibbons in northern Vietnam by strengthening community conservation teams to help government rangers in forest protection, biomonitoring, and enforcement activities. Building conservation values in local communities by providing environmental education at local middle schools and designing sustainable livelihood interventions in 13 communities.	Eastern Black Crested Gibbons	Asia	Vietnam
Fauna & Flora International (ADM Capital Foundation)	Eastern Caribbean Island Conservation	Reversing the population decline of species in the Eastern Caribbean Offshore Islands Network. Working with five countries to turn 24 offshore islands into wildlife sanctuaries for the Antigua racer snake and other animals. Engaging local youth and creating new opportunities for education and tourism.	Antigua and Saint Lucia Racers	Central/ South America	Antigua and Barbuda
Frankfurt Zoological Society (Frankfurt Zoological Society - U.S.)	Conservation of Sumatran Elephants	Protecting rainforest habitat for elephants in Sumatra and promoting human-elephant coexistence to realize a brighter future for both people and native wildlife. Supporting and educating local farming communities on causes of conflict with elephants, empowering alternative, elephant-compatible livelihoods, and monitoring and safeguarding elephants.	Sumatran Elephants	Asia	Indonesia

Disney Conservation Fund Two-Year Grant Recipients 2017

Fundación para la Conservación de los Andes Tropicales (Administrators of the Tulane Educational Fund)	Umbrellabird Conservation in the Choco	Empowering communities in northwest Ecuador to obtain, interpret, and effectively use reliable information to protect forests and understand how their actions impact forest biodiversity and their community's well being. Facilitating community engaged research activities in the Mache Chindul Reserve and replicating this model on a larger scale throughout the region in partnership with private reserves, communities, and the Ecuadorian Ministry of the Environment.	Long-wattled Umbrellabirds	Central/ South America	Ecuador
Global Wildlife Conservation	Rewilding Australia with Tasmanian Devils	Working to reverse the decline of the Tasmanian devil on the Australian mainland and re-establish it as an apex predator, as well as six other endemic species that were once widespread in the regional ecosystem. Raising public awareness about challenges faced by Australia's wildlife.	Tasmanian Devils	Europe/ Australia	Australia
Gorilla Rehabilitation and Conservation Education Center	Grauer's Gorilla Conservation Through Education	Engaging communities in the Democratic Republic of Congo to combat deforestation of key forest habitat for Grauer's gorillas. Providing education programs and launching fuel-efficient stove and woodlot projects with local women's and youth groups to reduce deforestation.	Grauer's Gorillas	Africa	Democratic Republic of The Congo
Grassroots Wildlife Conservation	Grassroots Conservation of Rare Turtles in Metro-Boston	Protecting three turtle species in Boston with the help of citizens and local school children. Enhancing wetland habitat, protecting nests, and raising hatchlings in local schools to increase the turtle survivorship to adulthood. Engaging participants in hands-on turtle conservation and creating an informed community of wildlife stewards in urban and suburban habitats.	Blanding's, Spotted, and Wood Turtles	North America	United States
Greater Farallones Association	LIMPETS	Expanding a program that empowers 6,000 middle and high school students a year to actively participate in scientific data collection through a hands-on citizen science program along the California coast. Bringing the program to new underserved schools in the San Francisco Bay Area to increase young people's awareness of marine life and stewardship of the ocean environment while providing valuable data to researchers.	Pacific Mole Crabs and 26 Rocky Intertidal Species	Marine	United States
Gunung Palung Orangutan Conservation Program	Orangutan Research, Education and Conservation	Conserving the wild orangutan population in Gunung Palung National Park in Indonesia. Monitoring health status of orangutans and combining research with conservation planning. Sharing knowledge with communities through environmental education activities and protecting rainforest habitat through sustainable livelihood programs.	Bornean Orangutans	Asia	Indonesia
Health In Harmony	Expanding Orangutan Habitat Conservation	Working to conserve Gunung Palung National Park in Indonesia, which is home to 5-10 percent of the world's orangutan population and provides a watershed supporting 60,000 people. Implementing integrated initiatives to break the cycle of poverty, poor health, and environmental degradation through clinics, reforestation sites, conservation education programs, and sustainable livelihood training.	Bornean Orangutans	Asia	Indonesia
Instituto de Pesquisas Ecologicas (Houston Zoo)	Lowland Tapir Conservation Initiative, Brazil	Gathering scientific data to support the development and implementation of conservation action plans for tapirs and their habitat in Brazil. Expanding current programs in the Brazilian Cerrado, and using tapirs as a flagship species to catalyze habitat conservation, education, outreach, training, and tourism initiatives.	Lowland, South American, and Brazilian Tapirs	Central/ South America	Brazil
Instituto de Pesquisas Ecologicas (IDEA WILD)	Black Lion Tamarin Conservation in a Fragmented Landscape	Ensuring the long-term protection of the black lion tamarin monkey in Brazil by monitoring and supporting habitat management and promoting the use of restored habitat areas by the species. Engaging Brazilian students, teachers, and farmers by increasing awareness and promoting sustainable forms of income.	Black Lion Tamarins	Central/ South America	Brazil
International Crane Foundation	Reverse the Decline: Cranes	Expanding and strengthening efforts for recovery of the Siberian crane and supporting work to monitor and protect the relevant stopover sites along the birds' more-than-three-thousand-mile migration path.	Siberian Cranes	Asia	China

Disney Conservation Fund Two-Year Grant Recipients 2017

International Reptile Conservation Foundation	Guatemalan Endangered Reptile Awareness Program	Increasing the awareness of Guatemala's endangered reptiles and their habitats through the continuation of a highly successful, educational program. Expanding local capacity for the implementation of a comprehensive reforestation program and initiating a forest survey to inform protection of habitats and biodiversity.	Campbell's Alligator Lizards, Guatemalan Beaded Lizards	Central/ South America	Guatemala
International Rhino Foundation	Reverse the Decline: Rhinos	Addressing the threats of habitat loss and poaching by improving the range and effectiveness of anti-poaching patrols, increasing population numbers through a conservation breeding program, working with local communities to stop forest encroachment, and working with the Indonesian government to implement a national protection strategy.	Sumatran Rhinos	Asia	Indonesia
International Snow Leopard Trust	Protecting Mongolia's Endangered Snow Leopard	Expanding understanding of snow leopards in Mongolia through vital research and supporting management of the new Tost Nature Reserve, created specifically for snow leopard conservation. Increasing conservation awareness among young people and adults and collaborating with herder communities through programs proven to support livelihoods and reduce herder-snow leopard conflict.	Snow Leopards	Asia	Mongolia
Little Fireface Project (Cleveland Zoological Society)	Building Bridges for Loris Conservation	Ensuring the long-term protection of the Javan slow loris in Indonesia by building monitoring, and evaluating success of bridges that connect forest canopies. Studying genetic impacts of slow loris population isolation, and engaging children and farmers in education programs about the benefits of forest canopy connectivity for wildlife in agricultural areas.	Javan Slow Loris	Asia	Indonesia
Mabula Ground Hornbill Project (Virginia Zoological Society)	Mabula Ground Hornbill Project	Collecting data on genetic health, vocalizations, and range of southern ground-hornbill birds in southern Africa, and pioneering management and husbandry techniques for the species. Expanding awareness and education programs, and assisting landowners to provide suitable hornbill habitat in Namibia, Botswana, and Zimbabwe.	Southern Ground-Hornbill	Africa	South Africa
Marine Resources Development Foundation	Seagrass Surveys for Education and Conservation	Conducting seagrass surveys in the Florida Keys to collect baseline data on seagrass abundance, algae abundance, and species composition. Engaging students and teachers that come from around the country to conduct field work and data analysis. Providing a database accessible from their home classrooms for educational programs.	Turtle Grass, Manatee Grass, Shoal Grass, Manatees, Invertebrates, Fish	Marine	United States
National Audubon Society	Saving Maine's Migratory Seabirds	Protecting migrating Atlantic puffins at three Maine nesting islands. Enhancing nesting success of puffins and other rare migratory seabirds through disturbance protection from stewards and volunteers. Providing community education through conservation experiences for 3-6th grade children and family camps.	Atlantic Puffins	North America	United States
Northern Jaguar Project	Northern Jaguar: Viviendo con Felinos	Working with ranchers and communities surrounding Mexico's Northern Jaguar Reserve to minimize human-wildlife conflict, reduce jaguar mortality from poaching and poisoning, and restore wildlife habitat. Building conservation alliances to promote awareness and successful co-existence with wildlife, and engage youth as conservation ambassadors through activities that encourage kids to get outside and connect with nature.	Jaguars	North America	Mexico
Oikonos - Ecosystem Knowledge	Conserving Breeding Shearwaters in Oahu	Conserving wedge-tailed shearwater birds at the Freeman Seabird Preserve in Oahu through habitat restoration and bird colony monitoring. Working with students to implement ceramic modules designed to provide safe nesting sites. Continuing conservation research to help shearwaters survive in an urban environment by engaging local communities in hands-on solutions that promote public stewardship.	Wedge-tailed Shearwaters	North America	United States
Okapi Conservation Project (Wildlife Conservation Network)	Community Support for Okapi Conservation	Reducing the demand for illegal bush meat and illegal mining and poaching activities in the Democratic Republic of the Congo. Improving community welfare, promoting sustainable use of natural resources and preservation of okapi habitat by working with farmers' co-ops and women's groups to improve agricultural production, reduce deforestation, and monitor wildlife.	Okapis	Africa	Democratic Republic of The Congo

Disney Conservation Fund Two-Year Grant Recipients 2017

Pacific Bird Conservation	Mariana Avifauna Conservation Program	Protecting endemic bird communities of the Northern Mariana Islands from the threats causing population decline and potential extinction. Translocating birds to sanctuary and reserve islands, monitoring populations, and educating local island communities about the importance of preserving native birds and their habitats.	Mariana Swiftlets, Golden White-eyes	Europe/ Australia	United States (commonwealth)
Painted Dog Research Trust (Wildlife Conservation Network)	Community Field Conservation Training Initiative	Increasing conservation knowledge about painted dog conservation and providing environmental education through the first environmental school in Zimbabwe. Reducing painted dog population decline by engaging communities in field training and developing income-generating projects.	African Painted Dogs	Africa	Zimbabwe
Perry Institute for Marine Science	Reverse the Decline: Coral Reefs	Collaborating with experts in the Caribbean to protect the shrinking Bahamian reefs through a comprehensive study, training, and actions such as limiting harmful human contact with existing reefs, promoting natural coral reef ecosystem resilience, setting up coral nurseries, and experimenting with reef rehabilitation techniques.	Staghorn, Elkhorn and Star Corals	Marine	The Bahamas
Proyecto Titi (Wildlife Conservation Network)	Reverse the Decline: Monkeys	Supporting efforts in Colombia to protect and expand forest habitat, reduce the illegal wildlife trade, recycle more than three million plastic bags, and create alternative income sources for community members.	Cotton-top Tamarins	Central/ South America	Colombia
Reef Relief	Coral Reef Youth Education Program	Emphasizing the role of education as the first step to saving endangered coral reef ecosystems near the Florida Keys and globally through the Discover Coral Reefs School Program and Coral Camp for Kids Program. Engaging youth through group activities and training in marine species identification, oceanography, marine conservation, snorkel etiquette, and leave no trace principles.	Elkhorn and Staghorn Corals	Marine	United States
Saint Louis Zoo Association	Drone Monitoring of Grevy's Zebra Habitat	Working with local communities to conserve the endangered Grevy's zebra and its habitat. Using drones to investigate impacts of different land management practices on Grevy's zebra and livestock. Using research results to inform management decisions, and increasing local ownership of the project through education programs and building local capacity and skills for research.	Grevy's Zebra	Africa	Kenya
Santa Barbara Zoological Foundation	California Condor Nest Guarding Program	Increasing California condor populations through captive breeding and careful management. Researching how to encourage self-sustaining populations through the California Condor Nest Guarding Program. Sharing knowledge through formal and informal education programs with local communities.	California Condors	North America	United States
Save the Elephants (Wildlife Conservation Network)	STE Elephants and Bees Project	Building on successful efforts to improve human-elephant relationships by using honey bees as a natural deterrent for crop raiding elephants. Constructing beehive fences around the perimeter of small farms that are vulnerable to elephant invasions and providing farmers with efficient crop protection as well as an alternative source of income through honey sales.	African Elephants	Africa	Kenya
Save the Golden Lion Tamarin	Reverse the Decline: Monkeys	Supporting efforts in Brazil to restore enough forest fragments and golden-lion tamarin populations to save the species from extinction.	Golden Lion Tamarins	Central/ South America	Brazil
Save the Rhino International	Conserving Rhinos Through Community Engagement	Protecting the population of black rhinos reintroduced to Zambia's North Luangwa National Park between 2003-2010 by supporting school curriculums and implementing initiatives that allow children and adults to connect conservation with communities. Providing teacher training and educational resource familiarization workshops, community conservation events, and support for community visits into the Park.	Black Rhinos	Africa	Zambia

Disney Conservation Fund Two-Year Grant Recipients 2017

Sea Turtle Conservancy	Archie Carr Refuge Education Program	Building public stewardship of the Archie Carr National Wildlife Refuge in Florida with education programs and hands-on activities to teach residents and visitors about their link to sea turtle survival and the health of coastal ecosystems. Providing public education activities including Tour de Turtles, summer eco-camps, guided turtle walks, and public workshops conducted at the Barrier Island Center.	Sea Turtles	Marine	United States
Smithsonian Institution	Landscape Level Bird Habitat Conservation	Supporting bird conservation in Colombia by protecting and improving habitats in tropical agricultural landscapes while maintaining economic value and sustainability for farm communities. Conducting research and education on family-run coffee farms through collaborations with nonprofit organizations and conservation professionals.	Multiple Species	Central/ South America	Colombia
Spectacled Bear Conservation (Wildlife Conservation Network)	Community Conservation for Spectacled Bears	Protecting spectacled bears and their habitats in Peru by working closely with local communities and organizations to conduct population research and develop community environmental stewardship programs.	Spectacled (Andean) Bears, Mountain Tapirs	Central/ South America	Peru
the Jane Goodall Institute	Reverse the Decline: African Apes	Working with communities in the Democratic Republic of Congo to reduce hunting, and explore strategies to reintroduce rehabilitated apes (Grauer's gorillas and Eastern chimpanzees) to the wild. Increasing protection of great apes by local communities, and funding analysis and implementation of additional conservation strategies.	Grauer's Gorillas and Eastern Chimpanzees	Africa	Democratic Republic of The Congo
The Wetlands Institute	Jersey Shore Terrapin Conservation Project	Continuing long-term diamondback terrapin turtle research and conservation programs throughout the Jersey Shore to reduce terrapin mortalities along roadsides. Training undergraduate students and youth, surveying terrapin populations, expanding mark-recapture efforts, and connecting families and youth with nature through outreach and classroom-based activities.	Northern Diamondback Terrapins	North America	United States
TREE Foundation (WIDECAST)	Community Participation and Stakeholder Stewardship for Sea Turtle Conservation, India	Protecting sea turtles in India by patrolling nesting beaches and enhancing community participation in turtle conservation. Raising awareness and reinforcing a sense of stewardship among coastal communities and fishers to reduce sea turtle bycatch. Strengthening networks and advocating for practical conservation policies to better protect sea turtles.	Olive Ridley, Hawksbill, and Green Sea Turtles	Marine	India
Turtle Survival Alliance Foundation	India Turtle Conservation Program	Protecting and increasing threatened freshwater turtle populations in India through conservation measures and rear-and-release programs. Raising awareness of threats facing endangered turtles by facilitating community-based turtle population monitoring and providing training and environmental education to local communities.	Black-Softshell Turtles	Asia	India
University of Florida Foundation	Reverse the Decline: Butterflies	Identify the numerous at-risk butterfly species in Florida and California and to develop tailored conservation strategies for the most critical groups, including habitat restoration, captive breeding, and reintroduction programs.	Butterflies	North America	United States
University of Florida Foundation	Reverse the Decline: Sea Turtles	Combating the many threats to sea turtles by increasing public awareness, monitoring populations, and restoring marine habitat and beach nesting areas.	Sea Turtles	Marine	United States
University of Florida Foundation, Department of Wildlife Biology	Community-based Conservation of River Turtles	Contributing research to improve conservation strategies for the Amazon River turtle. Monitoring and protecting female turtles and their eggs, collecting biological data, and educating and training local villagers as collaborators of this ongoing 20-year project.	Giant South American, Yellow-spotted Amazon, and Six-tubercled Amazon River Turtles	Central/ South America	Brazil

Disney Conservation Fund Two-Year Grant Recipients 2017

University of Miami, Department of Marine Ecosystems and Society	Urban Shark Conservation and Research Program	Studying shark behavior and physiology along the South Florida coastline to provide insights on how species react to coastal urbanization. Using hands-on field research experiences to inspire youth to learn about marine biology and empower them to become advocates for ocean conservation.	Great Hammerhead, Bull, Blacktip, and Nurse Sharks	Marine	United States
Wildlife Conservation Society	Conserving India's Lion-Tailed Macaques	Implementing science-based conservation strategies for the endangered lion-tailed macaque, an endemic species of monkey inhabiting rainforests of the Western Ghats, India. Assessing impacts of forest use and enhancing the conservation support-base through targeted awareness programs and stakeholder engagement.	Lion-tailed Macaques	Asia	India
Wildlife Conservation Society	Reverse the Decline: Elephants	Supporting work that addresses both poaching and human-elephant conflict, protects elephant habitat, promotes conservation legislation and helps train local conservationists in Kenya.	African Elephants	Africa	Kenya
Wildlife Conservation Society	Reverse the Decline: Sharks and Rays	Supporting the recovery of sharks and rays by supporting the scientific management of fisheries, reducing the demand for shark and ray products, and advancing research to secure protected status for threatened species.	Sharks and Rays	Marine	Global
Wildlife Conservation Society	Reverse the Decline: Tigers	Improving the conservation status of Sumatran tigers by protecting habitat, reducing poaching, combatting illegal trade, strengthening protected area management and engaging local communities. Increasing Sumatran tiger populations by 25% by securing source populations within key tiger conservation landscapes and enhancing connectivity between populations.	Tigers	Asia	Indonesia
Zoo Conservation Outreach Group	Giant Armadillo Conservation Program	Understanding the biology and behavioral ecology of the endangered giant armadillo in Brazil through camera trap monitoring and direct observation data. Expanding research activities to the Cerrado and Atlantic Forest biomes, and promoting conservation awareness through education and outreach in local communities.	Giant Armadillos	Central/ South America	Brazil
Zoological Society of London (ZSL America)	Angel Shark Project	Protecting habitat for critically endangered angel sharks in the Canary Islands. Researching angel shark nursery areas, expanding a network of citizen scientists to monitor angel sharks and engaging local communities in best practices to minimize tourism impacts on angel sharks.	Angel Sharks	Marine	Spain
Zoological Society of London (ZSL America)	Thames European Eel Conservation Project	Reversing the population decline of the European eel in the River Thames in England by addressing loss of freshwater habitats and barriers to upstream migration. Re-opening a large tributary of the Thames for the eels, and leading broad outreach programs to educate students and recruit citizen science volunteers in supporting eel conservation.	European Eels	Europe/ Australia	United Kingdom
Zoological Society of San Diego DBA San Diego Zoo Global	Life in a Biosphere Reserve	Protecting vaquita porpoises, the most endangered marine mammal in the world, by working with fishing communities to reduce accidental catch of vaquitas when fishing for commercial species. Collaborating to develop a community-based approach to vaquita conservation in the Upper Gulf of California.	Vaquitas	Marine	Mexico
